Bibliography

What is Propolis?

Propolis is a resinous substance produced by bees. It is collected by bees from young shrubs, leaves and most of all exudates of the buds of selected trees. After adding some enzymes to what has been collected we have then proper propolis dubbed also as bee glue.

In Europe propolis has been known for centuries as nature's most unique substance with various medicinal properties.

Sore throat
Cough
Itchy throat
Hoarseness
Weakened immunity system

THROAT UNDER PROTECTION

CLAROSAN® is especially recommended in the autumn season and during rainy season, because of increased risk of infection, when the first symptoms of hoarseness or feeling of irritation or dryness of the mouth and throat appear....

Symptoms

Symptoms

Causes

Sore throats can be painful and annoying. Fortunately, most of them are caused by a minor illness and go away without medical treatment.

Self-care tips

Symptoms and signs of a sore throat include:

- swollen tonsils
- enlarged and tender glands in your neck
- a painful feeling at the back of your throat
- discomfort when swallowing
- hoarseness
- dry throat
- itching
